Despite Progress, the New Iraq Security Plan Will Take Months to Accomplish:

- Although there has been recent progress with the new Iraq security plan, Lieutenant General Odierno, the commander of Multi-National Corps-Iraq, cautioned against unrealistic expectations and urged patience, saying the new Iraqi security plan will take months, not weeks, to accomplish.

Attacks Kill 112 Shi'ite Pilgrims in Iraq:

- According to media reports, insurgents killed 112 Shi'ite pilgrims traveling to the holy city of Karbala in attacks across Iraq March 6. In the worst attack, two suicide bombers strapped with explosives detonated themselves in a street lined with tents in the city of Hillah, killing 77 people.

Although unit end-strength improved over time as more units deployed, the Iraqi battalions did not report at full strength. Seven battalions deployed to the area at 55 to 65% of their end-strength and another seven deployed at 65 to 85%. The final four deployed at over 95% of their end strength, demonstrating an improvement as Iraqi military leaders gained experience in the process.

[4.] Help Iraq Build Government Capacity and Provide Essential Services – Electricity Overview

Daily Electricity Supplied and Estimated Demand in Iraq Since January 2004

- During the week of March 1-7 electricity availability averaged 5.7 hours per day in Baghdad and 9.6 hours nationwide. Electricity output for the week was 14% below the same period in 2006.

[4.] Help Iraq Build Government Capacity and Provide Essential Services –**Electricity, Transportation and Water**

Electricity:

- The recently completed US Army-funded 400kV substation in Mosul, Ninewa province will incorporate power from Turkey, Syria, Mosul Dam and Mosul gas turbine generation plants and distribute it to the Iraqi National Grid.

Transportation:

- The railway continues to experience difficulty with the Ministry of Transportation (MoT) in obtaining authorization for fuel and payment. Iraqi law provides that fuel expenses must be derived from freight revenue. The IRR and MoT were working on an agreement with Syria to exchange revenue requirements for locomotive fuel. This will be sufficient to protect the movement of interchange traffic between Turkey, Syria and Iraq.

Water:

- The Gulf Region Division recently completed the installation of the Water Compact Unit and Distribution Network in Jurf As Sukhar, Babil province. This unit is a source of clean, potable, and reliable water distribution to one school and approximately 1,100 homes in five local villages.
- The recently completed US Army-funded Sen al-Thabban Water Project in Kirkuk province now provides potable water to more than ten villages in Sen al-Thabban. The previous source of drinking water for these villages was untreated water from the Zab River.

- The chart shows average daily power production in megawatt hours (MWh). 120,000 MWh goal equates to 20 hours at 6000 MW average supplied load or 24 hours at 5000 MW average supply load. Currently supplies are not much improved over last year when judged by hours of power, but this is due in part to an influx of new appliances. This has dramatically altered demand and diluted the effect of increased generation capacity on actual results.
